

Technical Advisory Committee – Somerville Landfill Visioning Project

The Technical Advisory Committee (TAC) was established at the beginning of this project to ensure that the project proceeds in a timely manner, addresses community concerns and adheres to the Timeline. In addition to these tasks, the TAC acts as a clearing house for information between various Borough organizations, the larger Stakeholders Committee and the public.

This group also liaises with outside organizations when additional research and information is required.

The committee consists of 12 members:-

- | | |
